1 Purpose

The Linewide North Extended Hours Community Agreement E1.3 Report (this Report) provides a summary of the reengagement consultation undertaken by Parklife Metro in accordance with Environmental Protection Licence (EPL) 21807 condition E1.3, with respect to extended work hours for concreting and support activities proposed for the Linewide North works located approximately between Lansdowne Road, Orchard Hills and Luddenham Road, Luddenham. The Linewide North community agreement report includes the Stabling and Maintenance Facility's (SMF) combined service route (CSR) works. Due to the SMF neighbouring a portion of the Linewide North footprint, the two separate scopes of work have been consolidated into this report to assess cumulative noise impacts.

All requirements of EPL 21807 relating to the Linewide North Community Agreement and where they are addressed in this Report are detailed in Table 1-1.

TABLE 1-1: EPL 21807 COMMUNITY AGREEMENT COMPLIANCE REFERENCE

Reference	Condition	Where addressed in this Report
EPL E1.1	The licensee may work outside standard construction hours (as defined in L5.1) in circumstances other than those permitted under conditions L5.3, L5.5, or any other condition of this licence if the Licensee:	This Report
	a) undertakes community consultation and agreement as described in E1.2;	
	b) submits to the EPA a written request to work outside the standard construction hours attaching information set out in E1.3; and	Submission of this Report
	c) obtains approval by the EPA to work outside standard construction hours.	Not applicable to this Report
EPL 1.2	The EPA may, in exercising its discretion to approve the works outside standard construction hours, review whether the licensee has obtained community agreement. Specifically, whether a substantial majority of the individual Noise Sensitive Receivers who together comprise the Community Affected Catchments and were contacted has consented to the planned works out of standard hours.	Section 6
	Any community consultation and agreement undertaken with respect to the proposed out of hours works (OOHW) must:	Section 5
	a) be prepared and implemented in accordance with the Interim Construction Noise Guidelines (DEC 2009), the Noise Policy for Industry (EPA, 2017) and AS2436-2010: Guide to noise and vibration control on construction, demolition and maintenance sites;	
	b) include consultation of all noise sensitive receivers within the Community Affected Catchments. This includes Noise Sensitive Receivers that have declined to participate in previous agreements unless a community member has explicitly requested not to be involved in any future consultation about future OOHW;	Section 6.1

Reference	Condition	Where addressed in this Report
	c) ensure that the noise sensitive receivers understand the nature of the works and any predicted impacts, including that consideration is made of additional requirements relevant to the needs of culturally and linguistically diverse Noise Sensitive Receivers, and include details for interpreting services for languages other than English where required.	Section 6.1, Appendix A and Appendix B
	d) include in the community consultations with Noise Sensitive Receivers the following information:	Section 6.1, Appendix A and Appendix B
	i. the actual works proposed;	
	ii. any expected impacts in clear, plain English based on noise modelling;	Section 6.1, Appendix A and Appendix B
	iii. the expected duration of the works;	Section Error! Reference source not found. , Section 6, Appendix A and Appendix B
	iv. any expected benefits for receivers;	Section 3.1.3, Section 6, Appendix A and Appendix B
	v. any other known concurrent OOHW that will be occurring; and	Section 4, Section 6, Appendix A and Appendix B
	vi. any other OOHW that will be occurring on the nights preceding and following the proposed works or, if the proposed work precedes or follows a weekend period, any other OOHW that will be occurring on the weekend.	Section 4, Section 6, Appendix A and Appendix B
	e) request consent from the Noise Sensitive Receiver for their responses to be provided to the EPA;	Appendix A
	f) ensure that a record is kept when a licensee is unable to contact a noise sensitive receiver after three attempts, including leaving "sorry I missed you" cards explaining the reason for the visit and requesting a return phone call; and	Section 6
	g) demonstrate, where the OOHW is predicted to go on longer than 28 calendar days, that the licensee has consulted the community in relation to re-engagement periods for the purpose of determining agreement from the community is maintained and continuing. Detailed records are to be maintained by the licensee of all community consultations, including attempts to contact Noise Sensitive Receivers, and must be maintained for the duration of the licence. Any Noise Sensitive Receiver who requests a copy of the record of conversations must be supplied with one.	Section 7

Reference	Condition	Where addressed in this Report
EPL E1.3	The licensee must report to the EPA the community consultation and agreement process that was undertaken with the Community Affected Catchments. This report to the EPA must be: a) prepared in writing;	This Report
	b) detail the steps taken to fulfil the requirements of condition E1.2;	Section 5.1
	c) demonstrate that the Noise Sensitive Receivers understood the nature of the works and any predicted impacts, including that consideration was made of additional requirements relevant to the needs of culturally and linguistically diverse Noise Sensitive Receivers;	Section 6, Appendix A and Appendix B
	d) provide the script used during the community consultation with Noise Sensitive Receivers;	Appendix A
	e) report community response and consent rates (including where no contact could be made) against the total community affected catchments, and must be broken down into response and consent rates based on sub-catchments that are delineated by affectation levels;	Section 6
	f) include a noise validation monitoring plan as required by E1.4; and	Refer to condition E1.4
	g) be submitted to the EPA at least 15 business days prior to any works that are the subject of the agreement being undertaken unless prior arrangements have been made with the EPA.	This report forms part of submission to EPA.
	A copy of the report must be:	Section 7
	a) kept by the licensee for the duration of this licence including on the premises, and made available to an EPA authorised officer on request; and	
	b) be made available on the licensee's project website or another website approved in writing by the EPA for the duration of the OOHWs permitted under condition E1.1. (Personal details of Noise Sensitive Receivers must be omitted).	Section 7
EPL E1.4	A noise validation monitoring plan must be submitted to the EPA for approval as part of the community agreement documentation prior to any OOHW occurring.	Not applicable to this Report. Will be submitted to EPA separately
EPL E1.5	Validation monitoring must be undertaken for any OOHW that are the approved under condition E1.1 and must:	Not applicable to this Report. Will be adhered to if Community Agreement is approved

Reference	Condition	Where addressed in this Report
	a) be undertaken in accordance with the monitoring plan prepared under condition E1.4;	
	b) be performed by a Competent Person;	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	c) be performed on at least the first 2 occasions (day, evening, nights) where OOHW will be undertaken and are likely to impact Noise Sensitive Receivers;	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	d) be performed on any other occasion (day, evening, night) where the nature of the works is likely to cause greater noise impacts than the first 2 occasions;	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	e) be representative of the impacts in terms of monitoring locations, time and duration of measurements; and	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	f) be recorded and provided to an EPA officer upon request.	Not applicable to this Report. Will be adhered to if Community Agreement is approved
EPL E1.6	If validation monitoring undertaken under Condition E1.5 shows that noise levels are higher than those predicted by any noise modelling undertaken as part of the community agreement, work practices must be modified immediately so that measured noise levels do not exceed predicted levels. Where it has been determined that works cannot be modified to achieve the predicted noise levels:	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	a) the licensee must report immediately to the EPA; and	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	b) after considering the circumstances EPA may withdraw its permission under E1.1.	Not applicable
EPL E1.7	Ongoing community engagement and agreement	Section 7
	a) For any approval of OOHW under E1.1 predicted to take longer than 28 calendar days to remain valid, the licensee must be able to demonstrate agreement from the community is maintained and continuing.	
	b) To demonstrate agreement from the community is maintained and continuing the licensee must:	Section 7

Reference	Condition	Where addressed in this Report
	i. engage the community to determine if a substantial majority of Noise Sensitive Receivers continue to consent to the OOHW pursuant to the re-engagement period determined under condition E1.2(d);	Section 7
	ii. provide the EPA with a report within 7 calendar days of the end of each re-engagement period summarising the community response including ongoing consent rates of the Noise Sensitive Receiver; and	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	c) Where the licensee is unable to demonstrate a substantial majority of agreement from Community Affected Catchment is maintained and continuing:	Not applicable to this Report. Will be adhered to if Community Agreement is approved
	i. the licensee must report immediately to the EPA; and	
	ii. after considering the circumstances EPA may withdraw its permission under E1.1.	Not applicable to this Report

2 Project overview

Sydney Metro is Australia's biggest public transport program comprising four main packages of work including Metro North West Line, Sydney Metro City and Southwest, Sydney Metro West and Sydney Metro Western Sydney Airport. The Sydney Metro Western Sydney Airport Project (the Project) will become the transport spine for Greater Western Sydney, connecting communities and travellers with the new Western Sydney International (Nancy-Bird Walton) Airport (referred to as Western Sydney International) and the growing region.

The Sydney Metro Western Sydney Airport Environmental Impact Statement (EIS) was prepared in October 2020, which assessed the impacts of the construction and operation of the Project. The Project EIS was placed on public exhibition for a period of six weeks from 21 October to 2 December 2020. The Project was declared a Critical State Significant Infrastructure (CSSI) Project and is listed in Schedule 5 of State Environmental Planning Policy (State and Regional Development).

The Sydney Metro Western Sydney Airport Project was approved by the Minister for Planning and Public Spaces on 23 July 2021 (SSI 10051) under section 5.19 of the Environmental Planning and Assessment Act 1997 (EP&A Act). Modification 1 of the Project Approval, to reduce the biodiversity offsets credit requirements, was approved on the 14 April 2022.

2.1 Stations, systems, trains, operations and maintenance

The Project involves the construction and operation of a new metro railway line around 23km in length that extends from the existing Sydney Trains suburban T1 Western Line at St Marys in the north to Bradfield in the south at Bringelly. The alignment includes a combination of tunnel, surface, bridges and viaduct sections, and comprises of six new metro stations between St Marys and the Bradfield precinct, as well as a stabling and maintenance facility and operational control centre to support the operation of the new metro railway line (Figure 2-1).

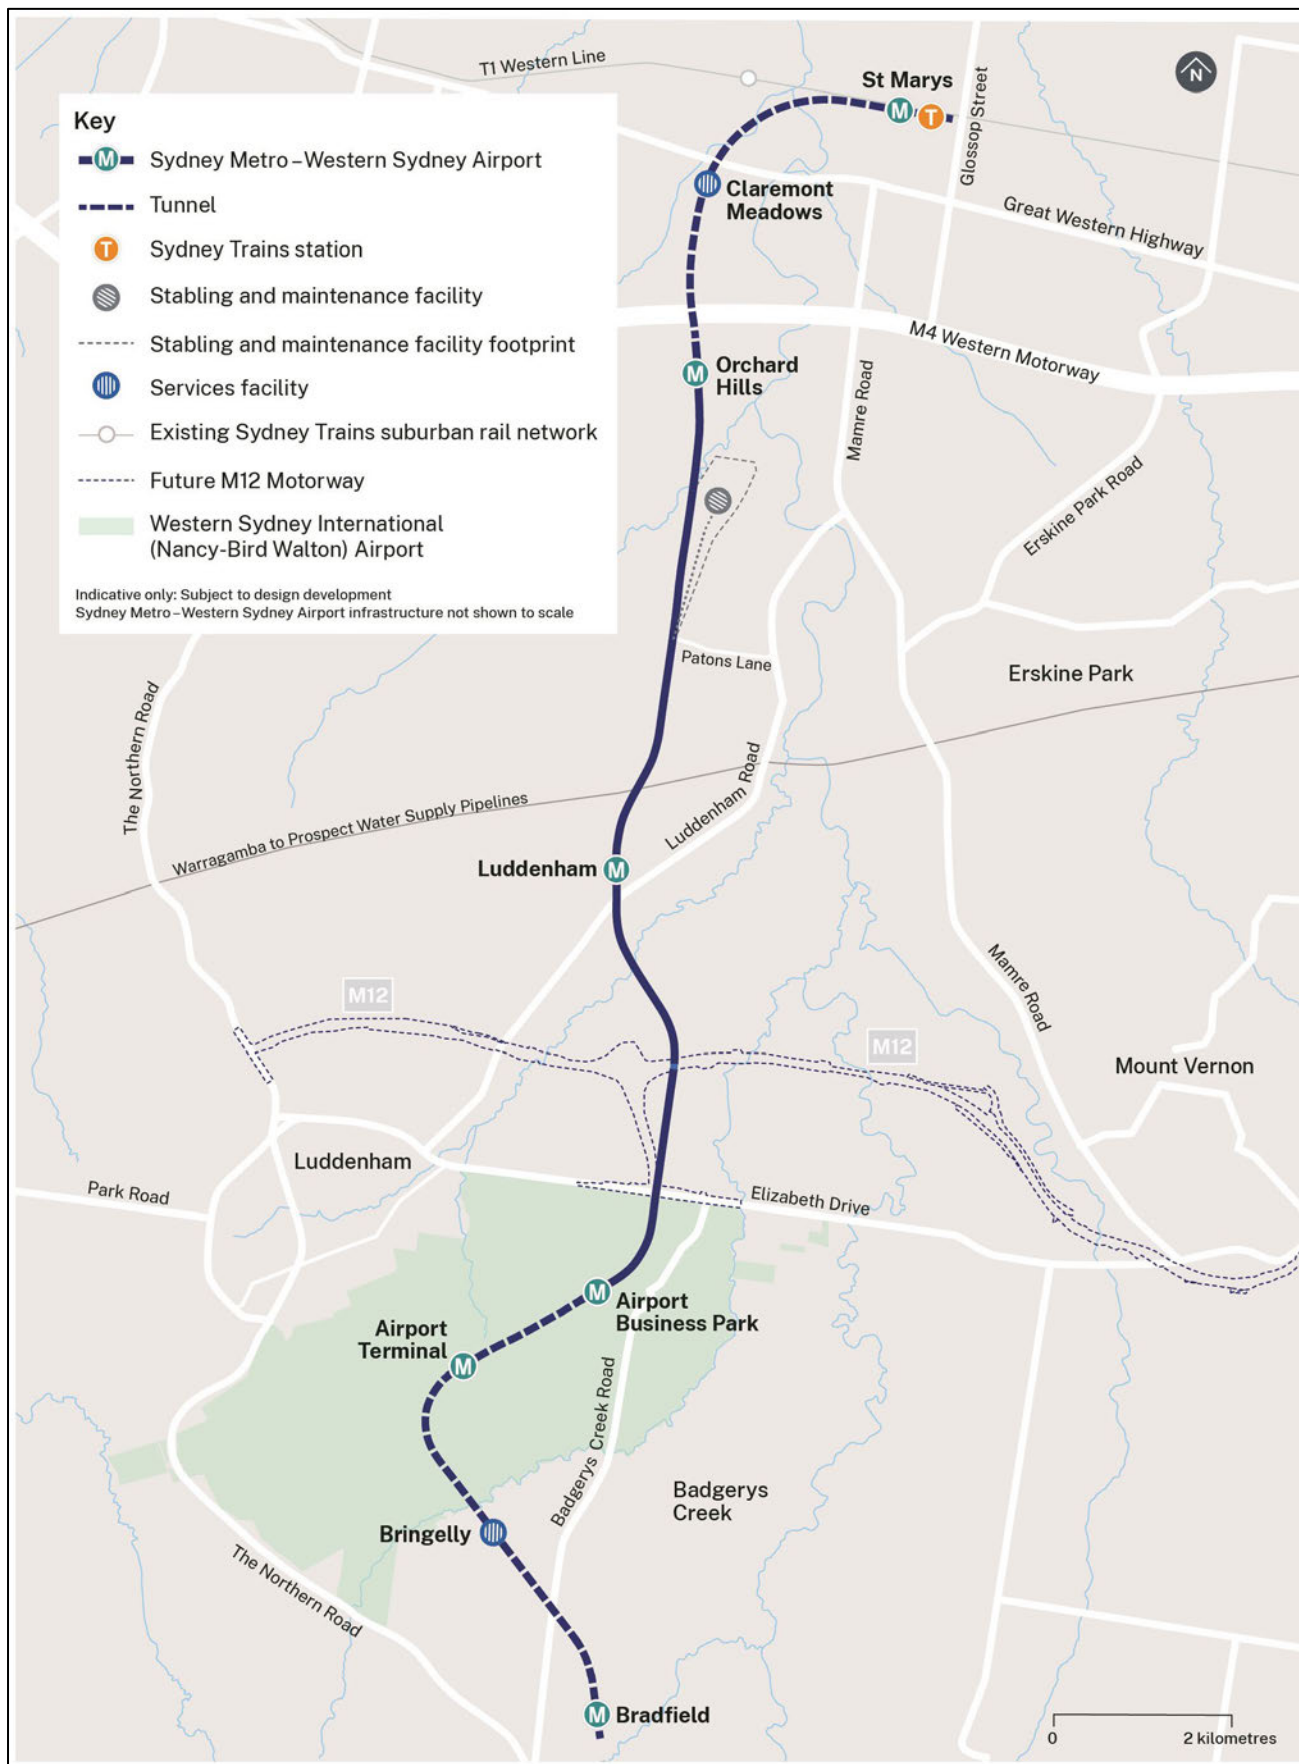

FIGURE 2-1: MAP OF THE SYDNEY METRO -WESTERN SYDNEY AIRPORT PROJECT ALIGNMENT AND STATION LOCATIONS

3 Proposed Out of Hours Works

3.1.1 Linewide North operations scope

The Linewide North alignment subject to this report consists of a combination of viaduct, at grade and bridge structure from approximately Lansdowne Road, Orchard Hills to Elizabeth Drive, Badgerys Creek.

3.1.2 Linewide North construction scope of works

Linewide works largely consist of:

- **Trackwork:** The rail will be installed onto the track slab, which would be formed by mass concrete pours or ballast for the SMF and surface sections of track. Rail track would be delivered to existing access points, where possible, and welded together to form lengths of up to 120m, for transport along the alignment, or welded into final position where access allows.
- **Signalling and services:** Cable routes would be provided within the tunnel environment for signalling, communications and electricity, with signalling and communication rooms provided at every second cross passage, alternating with power equipment rooms within the other cross passages. Signal equipment rooms and communication rooms would be provided at the stabling and maintenance facility, at each station and alongside the surface alignment as required. Overhead power would be installed on overhead catenary systems, affixed to masts installed on concrete plinths. Other services to be installed include high voltage power, which will be installed within the rail corridor.
- **Corridor works:** Other ancillary works within the SSTOM Works boundary will include boundary and rail fencing and construction of the active transport corridor along with associated landscaping and bridging structures.

3.1.3 Extended Post Concrete Support Works

As described above, mass concrete works are required for the track slab. Once the concrete has reached its initial set, work crews will commence the removal of temporary track support (spindles). The disassembly of the spindles is time dependent on curing process e.g. temperature, completion of pour. This activity will require an electric hand tool completed in short bursts.

There will be concurrent material distribution of sleepers and rails via a skid-steer or 5t excavator.

3.1.4 Extended Concrete Pours

Weather dependent, concrete is required to be poured at certain times to meet its curing design constraints. Early morning starts during the night period will be required to allow for concrete agitators, vibrators, and hand tools to be used to ensure works can be completed efficiently. There will be concurrent material distribution of sleepers and rails via a skid-steer or 5t excavator.

3.2 Stabling and Maintenance Facility

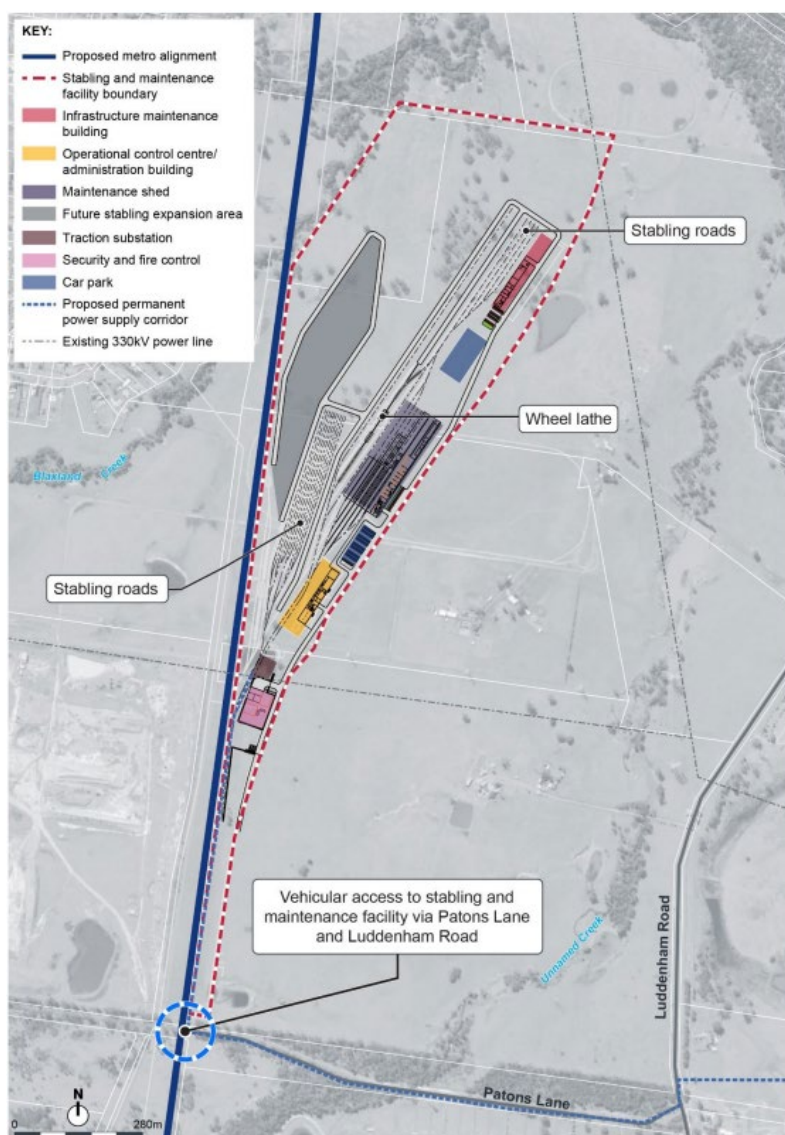

3.2.1 SMF operations scope

The SMF will provide supporting infrastructure for the ongoing maintenance of rolling stock of Sydney Metro Western Sydney Airport line. The main buildings at the site will include the Operations Control Centre (OCC), maintenance and administration buildings. The OCC is the control centre for the centralised control and monitoring of operation activities. It is located adjacent to the Rolling Stock Maintenance Workshop and Administration Building. The OCC will include the Depot Control Centre (DCC), Maintenance Diagnostics Centre (MDC), staff support facilities and associated plant and equipment functions.

The maintenance and administration building is the largest building at the SMF. It contains the maintenance and administration functions which is critical to the operation of the Metro Line and will be subject to 120-year design life and security requirements.

The third building on site will be the substation building, which will provide the electrical supply for the SMF and traction power for the SMF and the network. Major works will include construction of the buildings, pavement and road furniture, mechanical, electrical, plumbing, fire services, track alignment and track form, fencing and landscaping. Utilities works for the SMF will include a 132kV bulk power supply, potable water and wastewater (sewer).

FIGURE 3-1: SMF INDICATIVE LAYOUT (EIS CHAPTER 7)

3.2.2 SMF CSR scope of works

The scope of the Combined Services Route (CSR) involves the construction of a network comprising conduits, pits, and concrete works. The CSR works include the installation of high voltage (HV), low voltage (LV), and other services at SMF. The activities associated with these works are as follows:

- Supply of precast pits (HV, LV, signals, and communications) and conduits
- Excavation of trenches via benching
- Supply and installation of bedding materials
- Backfilling of trenches as per trench detail
- Installation of pits and pipes
- Compaction testing on bedding and general fill materials
- Mandrel testing and rope conduit installation.

The scope of works will be split into the following staging areas as shown in Figure 3-2:

- Access track: consisting of comms, LV and lighting conduits
- Hardstand area: consisting of comms, LV and lighting conduits
- Rail Corridor: consisting of comms, signal, LV and lighting conduits.
- Precinct A consisting of comms and signal conduits
- Precinct B to A consisting of HV conduits.
- Precinct E consisting of signal, LV and comms.
- Precinct B substation consisting of HV and LV
- Precinct B to D consisting of HV conduits
- Precinct G consisting of LV, signal,

The works proposed to be conducted outside of standard hours includes:

- Excavation and backfilling of trenches
- Installation of pits, conduits and services
- Compaction on bedding and general fill materials

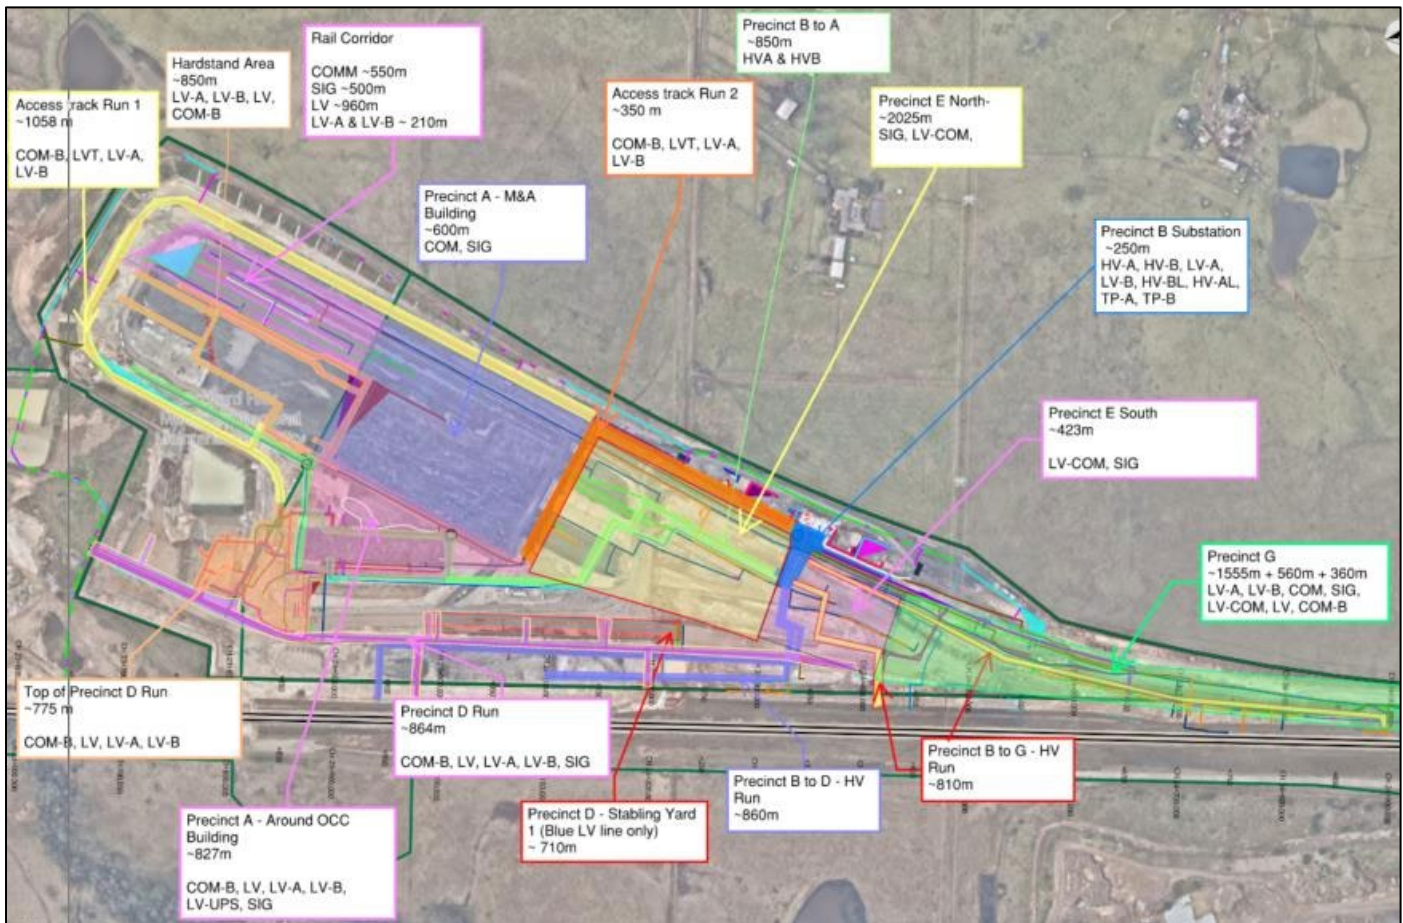

FIGURE 3-2 CSR WORKS STAGING

3.3 Extended work hours rationale

Current approved standard construction hours under EPL 21807 are 7am to 6pm Monday to Fridays and 8am to 1pm. As described above, extended hours are required for Linewide North concrete pours and support works to align disassembly of spindles with curing times and ensuring works can be completed efficiently to achieve curing design constraints.

The proposed Linewide North works to be undertaken outside of standard construction hours will be:

- 7am Monday to 6pm Saturday

The Linewide North works are planned to occur OOH from May 2025 to April 2026.

Due to the tight site constraints at SMF and the interface with other works required in the same area, conducting CSR works during standard hours is expected to delay the completion of works at SMF. This would extend the overall noise impacts on nearby residential receivers.

Extending the working hours for CSR works will significantly reduce the overall duration of these impacts, shortening the timeline by approximately three months. Additionally, extended working hours will help eliminate interface safety risks and allow other works within standard hours to be completed more safely and efficiently.

Given the CSR works have a lower noise impact compared to other activities, this adjustment will result in an overall reduction in noise impact for nearby residential receivers.

The proposed CSR works to be undertaken outside of standard construction hours will be:

- 6pm to 2am Monday to Friday (inclusive)
- 1pm to 6pm Saturday.

The out of hours CSR works at the SMF are expected to continue until August 2025.

3.4 Concurrent Works

The proposed Linewide North and CSR works have the potential to occur concurrently with works approved through other EPL licence conditions at SMF and Orchard Hills Station as described in Table 3-1 below. A cumulative impact assessment has been conducted as outlined in section 4.1.3.

TABLE 3-1 OTHER WORKS AT SMF AND OHE WITH RELEVANT EPL CONDITION.

Work location	Work description	EPL condition
SMF	Concreting, formwork and steel fixing	L5.12
OHE	Batch plant	L5.13
	Station box concrete pour, formwork and steel fixing	L5.10
	Tunnel and underground station box support and fit out	L5.14
	Precast concrete beam installation	L5.11

4 Detailed Noise and Vibration Impact Statement

4.1 Modelled scenarios

A Detailed Noise and Vibration Impact Statement (DNVIS) has been prepared by the acoustic consultants, VMS, detailing the predicted impacts to receivers and the required mitigation measures for

- The Stabling and Maintenance Facility (SMWSASSM-PLD-OHE-SF153-NV-RPT-000003 - SMF OOH DNVIS Rev02)
- Linewide works (SMWSASSM-PLD-SWD-SW000-NV-RPT-000003 SWD - Linewide - DNVIS Rev00)

The Noise Catchment Areas (NCAs) and Noise Management Levels (NMLs) relevant to the works are detailed in Table 4-1. Descriptors of each NCA is detailed in Table 4-2.

For reference the nearest residence is located to the west at 327 Luddenham Road, Luddenham, however due to the close proximity, either an exclusion zone for night-time works will be established in close proximity to this residence or

alternative accommodation will be offered. The next closest residence is located to the west along Lansdowne Road and Samuel Marsden Road, Orchard Hills.

TABLE 4-1 RELEVANT DNVIS NCAS AND NMLS

Receiver	Noise management level (dBA)			
	L _{Aeq} (15min)			
Residential Receivers	Standard Hours ¹	OOH – Day ²	OOH – Evening ²	OOH – Night ²
Residences within NCA06	47	42	37	36
Residences within NCA07	57	52	47	35
Residences within NCA08	54	49	49	45
Residences within NCA09	50	45	44	39
Residences within NCA10	45	40	35	35
Other sensitive receivers	Based on ICNG L _{eq} (15minutes) – dBA			
Educational	55			
Commercial	70			
Industrial	75			

1. Standard construction hours are 7am to 6pm (Mon to Fri) and 8am to 1pm (Sat)

2. Out-of-hours (OOH): OOH Day from 1pm to 6pm Saturday; 8 am to 6 pm Sunday and Public holidays;

OOH Evening from 6 pm to 10 pm Monday to Saturday and 6pm to 10pm Sunday;

OOH Night from 10pm to 7am Monday to Friday, and from 10pm to 8am Saturday, Sunday and Public holidays

TABLE 4-2: NOISE CATCHMENT AREA DESCRIPTIONS

NCA	Description
NCA06	Predominantly medium density residential dwellings to the east of Gipps Street and south of Caddens Road. Ambient noise conditions are dominated by traffic along M4 Western Motorway and Gipps Street.
NCA07	Predominantly medium density single-storey residential dwellings, located to the east of the project. Ambient noise conditions are dominated by traffic along Mamre Road.
NCA08	Predominantly low-density single storey residential dwellings. East of the project is mostly open land with scattered receivers along Samuel Marsden Road and Lansdowne Road. Ambient noise conditions are dominated by traffic along the M4 Western Motorway.
NCA09	Open farmland and a grouping of low-density single storey residential dwellings within 1200 metres east of the project along Luddenham Road.
NCA10	Open farmland with low density single storey and multi-storey residential dwellings within the Twin Creeks area east of the project, and scattered residential dwellings along Luddenham Road

The following sections outline the scenarios assessed for each work package as well as cumulative assessments. The combined impacted receivers identified in the noise assessments make up the identified Community Affected Catchments and comprised the receivers that were contacted as part of this Community Agreement seeking consent as detailed in Section 5.

4.1.1 Linewide

In addition to the Linewide DNVIS, a noise assessment on a reduced scope for Linewide North_Extended Hours works has been prepared using the SSTOM Linewide Construction Noise Prediction Tool supplied by acoustic consultants, VMS, detailing the predicted impacts to receivers of the proposed Community Agreement extension of hours. Plant and equipment associated with each work activity is outlined in Table 4-3. As multiple activities will be occurring at the same time for the Linewide North works, the scenarios outline in Table 4-4 were assessed.

TABLE 4-3 PROPOSED ACTIVITIES TO BE UNDERTAKEN

Activity ID	Work Activity	Plant and Equipment	Number
1	Removal of temporary track supports	Rattle gun	1
		Bobcat/ Skid-steer/5t excavator (at grade locations)	1
		Rubber tyred excavator (20T)/ front loader (18T) (viaduct locations)	
		Hand tools	1
2	Formwork installation/removal	Hand tools	1
3	Survey	Hand tools	1
4	Rail weld	Welding equipment	1
5	Concrete pours	Agis	5 (2) ¹
		Concrete pump	1
		Concrete vibrator	1
		Hand tools	2
		Hiab crane truck	1

1. Number in brackets () represents reduced plant modelled for the night period.

TABLE 4-4 ASSESSED NOISE SCENARIOS

Scenario ID	Out of Hours Assessment Period	Relevant Work Activities
1 – Concrete support works	Weekend Day	1
	Evening	2
	Night	3
		4
2 – Concrete pours	Weekend Day	5
	Evening	
	Night	

4.1.2 Stabling and Maintenance Facility

The CSR works were assessed in the DNVIS under works activity (WA) 22 and 23, for the evening and night periods respectively. The CSR works have the potential to occur concurrently with other works at SMF (concreting), although this is only likely to occur on rare occasions. To determine if additional residents would be impacted by the cumulative impacts of these works occurring concurrently, a comparison between the Scenarios 35 (compound use and concreting works modelled during the night period as the worst case time period) and Scenario 36 (compound use,

concreting and CSR works modelled during the night period as the worst case time period) was conducted. An additional 20 residents were identified to be consulted (Table 4-6).

TABLE 4-5 SMF DNVIS MODELLED SCENARIOS

Scenario	Work Activities (WA)		
	Compound use (WA2 ¹ /3 ²)	Concreting works (WA 6 ¹ /7 ² , 9 ¹ /10 ² and 12 ¹ /13 ²)	CSR (WA22 ¹ /23 ²)
S19¹/S35²	X	X	
S20¹/S36²	X	X	X
S22¹/S40²	X		X

1. Activities or scenarios modelled for evening period.

2. Activities or scenarios modelled for night period

TABLE 4-6 ASSESSMENT ON RESIDENTS TO BE CONSULTED

Scenario ID	Work activities	Number of impacted residents
35	Compound use Concreting	102
36	Compound use Concreting CSR works	122
<i>Difference</i>		20

4.1.3 Cumulative

As the works have the potential to occur concurrently with each other as well as works approved to occur outside of standard hours as described in Section 3.4 at the Stabling and Maintenance Facility and Orchard Hills Station site, a cumulative impact assessment has also been prepared by acoustic consultants, VMS as summarised in Figure 4-1 and Figure 4-2. The assessment identified any additional receivers impacted by the addition of the Linewide North to the works approved through alternate EPL conditions at OHE and SMF as shown in Figure 4-3.

Proposed Works and Areas	Concurrently Operating Plant
Linewide ¹ - Post-Concrete Works	1 x Bobcat 1 x FBWP Rail Welding Unit 3 x Hand Tools (General) 1 x Rattle Gun
OHE - Scenario 49 (S49) ²	Concrete Batching Plant (WA3) Compound Use (WA6) Concrete Pour (WA9) Formwork Installation and Steel Reinforcement Fixing (WA15) Tunnel Support (WA18) Tunnel Fitout via Dive/Tunnel Portal Prior to Rail Install (WA26) Water Treatment Plant (WA30)
SMF - Scenario 36 (S36) ³	Compound Use (WA3) Concrete Pour (WA7) Concrete Finishing (WA10) Formwork Installation and Steel Reinforcement Fixing (WA13) CSR (WA23) ⁴

Note 1: Refer to Linewide DNVIS (REF: 21239.1.15.R11R3) for plant sound power levels (SWLs). Scenario provided by PLM.

Note 2: Refer to OHE DNVIS (REF: 21239.1.10.R9R5) for scenario and work activity details including plant items, numbers and SWLs levels.

Note 3: Refer to SMF DNVIS (REF: 21239.1.17.R1R1) for scenario and work activity details including plant items, numbers and SWLs levels.

Note 4: The existing CSR work area that encompass WA23 may expand in the future to cover more of the SMF work site. It is worth noting that this expanded CSR work area was assessed separately and resulted in negligible cumulative noise impacts with Linewide works relative to the original assessed work area.

FIGURE 4-1 WORKS ASSESSED AS PART OF THE CUMULATIVE IMPACT ASSESSMENT

Scenario ID	Description ¹
S1	Linewide Post-Concrete Works
S2	Linewide Post-Concrete Works + Orchard Hills S49
S3	Linewide Post-Concrete Works + SMF S36

Note 1: Notwithstanding, it should be noted that the cumulative noise impacts of two worst-case scenarios is unlikely to occur.

FIGURE 4-3 SUMMARY OF ADDITIONAL OF RECEIVERS IDENTIFIED FOR CONSULTATION

4.2 Predicted impacts summary and mitigation measures

A total of 387 residences were identified to be consulted for the proposed works. A summary of prediction for each receiver included in Appendix E.

Table 4-7 outlines the modelled predicted airborne construction noise for OOH night as the period with the lowest NML. A breakdown of the number of affected receivers in each NCA is outlined in Table 4-8.

Due to the close proximity and potential impacts of night works to the residential receiver at 327 Luddenham road, either an exclusion zone will be imposed for OOH works between chainages CH 26 500-26 800 as shown in Figure 4-1 or alternative accommodation will be offered. Impacts discussed have been calculated with this exclusion zone taken into account.

FIGURE 4-4 OOH WORKS EXCLUSION ZONE

TABLE 4-7 PREDICTED WORST CASE AIRBORNE CONSTRUCTION NOISE FOR NIGHT PERIOD

Receiver Type	NML L _{eq(15minute)} dBA	Predicted Airborne Noise for each Scenario L _{eq(15min)} dBA							Cumulative impact (dB above worst case) ¹
		Linewide				SMF		Worst case	
		S1	S2	DNVIS S4	Difference	S36	S40		
Noise Catchment Area 06									
Residential	36	40	39	43	-3 to -4	-	-	40	0 (+2) ²
Noise Catchment Area 07									
Residential	35	36	34	41	-4 to -6	36	-	38	+2
Noise Catchment Area 08									
Residential	45	59	58	61	-2 to -3	53	48	59	0 (+4) ²
Noise Catchment Area 09									
Residential	39	58	57	72	-14 to -15	46	46	58	0 (+3) ²
Noise Catchment Area 10									
Residential	35	52	52	59	-7	-	-	52	0

1. Cumulative impacts of 0 indicate that impacts do not increase above the worst case predictions as outlined in the cumulative impacts assessment.

2. Numbers in brackets () indicate maximum cumulative impact within each noise catchment

TABLE 4-8 SUMMARY OF NUMBER OF IMPACTED RESIDENTIAL RECEIVERS IN EACH AFFECTION LEVEL (DB RANGE >NML)

Scenario 1 Number of Receivers where NMLs are Exceeded					
Noise Period	0 – 10dB >NML	10 – 20dB >NML	20 – 30dB >NML	>30dB >NML	Total
OOH Night (Weekday 6-7am)	73 (NCA06)				387
	168 (NCA07)	6 (NCA08)			
	96 (NCA08)	1 (NCA09)	Nil	Nil	
	12 (NCA09)	2 (NCA10)			
	29 (NCA10)				
	378	9	Nil	Nil	

In summary Scenario 1 (support works) is predicted to have the highest impact for all NCAs at night except for cumulative impacts in NCA 07. Majority (97.7%) of receivers are within the 0-10dB range, with only 2.4% of receivers predicted within the 10-20dB range and no receivers predicted to be impacted by 20dB or more.

On the basis of the predicted levels for the proposed works, all reasonable and feasible mitigation measures that could reduce noise impacts will be implemented for residential receivers within NCA 06, 07, 08, 09 and 10.

Additional Mitigation Measures will be implemented as per the Sydney Metro Construction Noise and Vibration Standard (CNVS). Mitigation Measures will mostly include letterbox drops and monitoring (noise) with specific notification and project specific respite offers to be offered for up to 9 residences during the OOH night period. Project specific respite will be offered to these residences should the extended hours be approved.

PLM will implement all mitigation measures outlined if the proposed extended hours are approved.

5 Community Agreement Consultation

5.1 Timeline and process

Table 5-1 details the timeline of consultation activities undertaken for the Linewide's Community Agreement. The strategy for the Community Agreement consultation was develop in accordance with:

- EPL 21807 condition E1.2
- PLM Construction Environmental Management Plan
- PLM Noise and Vibration Management Sub-Plan
- PLM Community Communications Strategy
- The Interim Construction Noise Guidelines (DEC 2009)
- Noise Policy for Industry (EPA, 2017), and
- AS2436-2010: Guide to noise and vibration control on construction, demolition and maintenance sites

The process undertaken for consultation for this Community Agreement is detailed in Table 5-1. Affected receivers identified in the noise assessment outlined above were included as the receivers required to be consulted for this Community Agreement (Community Affected Catchment).

A total of 48 properties were removed from the engagement consultation as residents have advised they do not wish to be contacted or the property no longer exists, this is reflected in Table 6-1, 6.2 and in Appendix F.

TABLE 5-1: COMMUNICATION ACTIVITIES PROCESS TIMELINE

Date	Activity	Details
25 March 2025	April 2025 Monthly Notification distributed to 200m radius of project sites which includes notice for intent to undertake extended out-of-hours work if consented to by the community	Upload to Sydney Metro website Letterbox distribution Consultation Manager email blast Upload to Sydney Metro App
18 March to 15 April 2025	First doorknock attempt of impacted receivers, as per the DNVIS	Initial attempt to contact impacted properties via doorknocking. Specific notification and consent slip provided or left in letterbox.
10 to 17 April 2025	Second doorknock attempt of impacted receivers, as per the DNVIS	Follow up with impacted properties we have been unable to reach via doorknocking and emails. Specific notification and consent slip provided or left in letterbox.
14 to 24 April 2025	Third doorknock attempt of impacted receivers, as per the DNVIS	Follow up with impacted properties we have been unable to reach via doorknocking and emails. Specific notification and consent slip provided or left in letterbox.
4 to 9 August 2025	Three-month reengagement consultation via doorknock and email for impacted receivers, as per the DNVIS	Doorknocking and emails for the stakeholders consulted in Appendix E. Continuation Consent Form provided or left in letterbox.

5.2 Additional community communication activities

In addition to the Community Agreement consultation activities detailed in this Report, PLM undertake community consultation for all works, within or outside of standard hours, in accordance with the Project Community Communications Strategy (CCS) and the Project's Environmental Protection Licence (EPL) 21807. The communication activities are detailed in Section 5 and Section 6.

TABLE 5-2: ADDITIONAL COMMUNITY COMMUNICATION ACTIVITIES

Type	Purpose and use
Monthly construction updates	<p>A monthly construction update distributed at the start of each month, providing details on:</p> <ul style="list-style-type: none"> • Upcoming construction activities for the month, including any OOHW • Hours of work, and durations • Equipment used on site • Traffic, pedestrian and cyclist routes on any changes, closures, and/detours • Likely impacts of construction activities, including noise, vibration, traffic, access, and dust • Mitigation measures to reduce the impacts of activities • Work location maps • Contact details, including how feedback can be provided
Specific notifications	<p>Specific notification distributed to those identified as impacted receivers during the OOHW.</p> <p>Specific notification is used to support the monthly construction updates and OOHW notifications, to provide additional details on the impacts, and any changes that may occur.</p>
Doorknocks	Doorknocks to impacted properties
Community Information Line: 1800 717 703	Provides community access to the project communications team during construction hours. OOH complaints will be referred to the on- call Place Manager.
Sydney Metro email: sydneymetrowsa@transport.New South Wales.gov.au	Provides access during business hours to the Sydney Metro project communications team. Website enquiries are directed through this email address.
Postal address for written feedback: Sydney Metro, PO BOX K659 Haymarket, NEW SOUTH WALES 1240	Provides access to the broader Sydney Metro project. Address is included in all notifications and newsletters.
Consultation Manager	All interactions with stakeholders will be recorded in this database which is established by Sydney Metro.

6 Consultation Results

6.1 Impacted properties and consultation records

Community consultation to seek community consent for the proposed extended out-of-hours work has been undertaken in accordance with EPL 21807 condition E1.2. Appendix F details all consulted receivers that are identified in the noise assessment, the NCA of the receiver, the affectation level of the receiver for all scenarios, the consultation undertaken per receiver, and the receiver's response on whether they do or do not consent to the extended hours or alternatively whether contact could not be made.

6.2 Response statistics

The summary of response statistics are shown in Table 6-1. In total, consultation covered 387 receivers, this is a reduction to the previous consultation numbers due to receivers opting out of the three monthly re-engagement or the premise has been identified as a business. These receivers had predictions above the NML for the night period predicted and therefore were required as a minimum to be consulted as part of this Community Agreement.

Of the required receivers (387), 97.67% (378) of receivers have predictions within 0 to 10 dB above the NML, and 2.32% (9) of receivers have predictions within 10 to 20 dB above the NML. No receivers have predictions within 20 to 30 above the NML.

Table 62 shows that overall, across all NCAs of required receivers (387), 172 approved, 18 declined (Appendix D) and 149 did not provide a response after reengagement attempts, via doorknock, emails and/or phone calls. A total of 48 receivers were removed as a result of the consultation as these receivers were identified to be businesses, unoccupied or advised they did not wish to be contacted. As shown in appendix E, of the 190 responses obtained, 20 of these were verbal and 170 of these were written.

Evident in Table 61, of the approving receivers, 167 were in the 0 – 10 dB>NML affectation range and 5 were in the 10 to 20 dB>NML affectation range. If this Community Agreement is approved, PLM will make additional attempts to contact and inform all receivers who were not contactable during this reengagement phase and will follow-up with all stakeholders for feedback every three months or as requested and at the conclusion of this Community Agreement.

Overall, of the 190 responses obtained, 172 approved and 18 declined equalling a consent majority of 90.53%.

TABLE 6-1: SUMMARY OF CONSULTATION RESPONSES FOR EACH NCA AND AFFECTION LEVEL (DB RANGE >NML NIGHT PERIOD)

Consent Outcome	Count of Predicted Receiver Consent Outcome					
Affectation levels (dB range >NML Night Period)	NCA 06	NCA 07	NCA 08	NCA 09	NCA 10	Total
0 to 10	73	168	96	12	29	378
Approved	21	100	34	4	8	167
Declined	2	2	14	0	0	18
No response	34	49	43	4	16	146
Property removed (unoccupied, business, refuse to respond)	16	17	5	4	5	47
10 to 20	0	0	6	1	2	9
Approved	0	0	3	1	1	5
Declined	0	0	0	0	0	0
No response	0	0	3	0	0	3
Property removed (unoccupied, business, refuse to respond)	0	0	0	0	1	1
20 to 30	0	0	0	0	0	0
Approved	0	0	0	0	0	0
Declined	0	0	0	0	0	0
No response	0	0	0	0	0	0
Total	73	168	102	13	31	387

TABLE 6-2: COUNT OF CONSULTATION RESPONSE

Consultation Response	Count
Approved	172
Declined	18
No response	149
Property removed (unoccupied, business, refusal of response)	48
Total	387

6.3 Consultation outcomes

All consultation conducted so far, including monthly construction updates, doorknocks, and specific notification visits to receivers identified as noise-impacted by the works, has resulted in a significant agreement.

In accordance with Condition E1.1c of the EPL, the outcome of the consultation is required to determine if a substantial majority of noise sensitive receivers consent to the proposed works being undertaken, which is determined to be 80% of the community affected catchment. The reengagement consultation for the proposed activity has determined that 90.53% of receivers who provided a response have consented to the continuation of works. Therefore, the substantial majority of impacted receivers have consented to the Linewide North additional out-of-hours work.

6.4 Considerations

The consulted community were generally comfortable to provide written consent. Some receivers during this consultation have been entirely unaffected by PLM works and reported to not have experienced any noise impacts. The proposed rezoning of Orchard Hills remains a negative discussion point for many consulted stakeholders. The feedback PLM took and implemented from the previous consultation around the request for no Sunday works was welcomed by the community.

7 Conclusion

This Report has demonstrated that all noise impacted receivers identified in the noise assessment have been contacted to obtain a response on whether they do or do not consent to the continuation of PLM Linewide North extended hours. Of the receivers who could be reached, the substantial majority of receivers consented to the extended works.

The standard mitigation measures and respite requirements established in the PLM Noise and Vibration Management Sub-Plan and the Sydney Metro Construction Noise and Vibration Standard (CNVS) will be implemented during the works if approved along with the EPL 21807 conditions E1 – E7.

During the reengagement consultation PLM again sought feedback regarding the engagement frequency preferred, with receivers electing for either three monthly or no feedback period for the duration of works. If the Linewide North extended hours are approved, PLM will reengage at the frequency identified by each resident, in accordance with EPL 21807 condition E1.7 to seek continuation of the community agreement.

Furthermore, in accordance with EPL 21807 condition E1.7 and the Project's requirements on complaints handling and reporting, any feedback received will be considered and implemented where feasible. Specific feedback or preferences on mitigation measures may necessitate a revision of the DNVIS.

PLM will keep a copy of this Report for the duration of the extended hours activities on the premises and published on the Project website. This Report is made available to an EPA authorised officer on request.

Appendix A Monthly Construction Update

Sydney Metro – Western Sydney Airport

Notification – Orchard Hills Metro Station and the Stabling and Maintenance Facility

Sydney Metro is Australia's biggest public transport project.

August 2025

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the new 23-kilometre metro railway will connect Bradfield city centre with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

Parklife Metro consortium is delivering the Stations, Systems, Trains, Operations and Maintenance (SSTOM) works. See the list below for the work activities at Orchard Hills during August.

What's new in August?

- delivery and installation of precast concrete beams
- tree removal on Kent Road and corner of Lansdowne Road.

Stations, Systems, Trains, Operations and Maintenance work includes:

Orchard Hills Metro Station:

- formwork, steel fixing and concrete pours inside the station box
- Installation of precast concrete elements and permanent services
- tunnel fit-out works
- construction of internal blockwork walls inside the station box
- surveying and geotechnical investigations, including potholing, non-destructive digging and testing along local surrounding roads to inform utility designs
- delivery of over-sized equipment, machinery and materials.

Stabling and Maintenance Facility:

- major earthworks including importing materials, excavations, constructing permanent basin, and compacting of the rail areas
- construction of a new 132kV powerline, connecting the substation to the Endeavor Energy Switching Station at Patons Lane
- on-going major drainage works including excavations, installing pits and pipes and backfilling
- site-wide concrete works, including formwork and steel fixing for various building structures
- combined services route and trunk services installation
- continuation of works on the permanent access road
- installation of steel structures and blockwork to major buildings
- mechanical, electrical, plumbing and architectural finishes activities in the major buildings;
- commencement of track formation scope
- cable pulling along Patons Lane towards the substation.
- ongoing deliveries of rail track, materials, machinery and equipment

Subscribe for updates at sydneymetrowsa@transport.nsw.gov.au

<https://www.sydneymetro.info/privacy-policy>

- flash butt welding of railway track on site
- installation of light pole footings

Linewide works – Orchard Hills to Warragamba Pipeline

- ongoing deliveries of rail track, materials, machinery and equipment to the project alignment at Lansdowne Road and Patons Lane. Rail dragging from the surface to the tunnel between Orchard Hills and St Marys and along the mainline between Orchard Hills to Warragamba Pipeline
- installation of cable containment and hydrant pipes on the viaducts and at-grade
- service utility installations and surveying
- concreting and formwork for the Blaxland, Unnamed and Warragamba viaducts and along the mainline between Orchard Hills to Warragamba Pipeline
- installation of brackets, cable containment and hydrant pipes in the tunnels from Orchard Hills toward St Marys
- combined service route installations
- rail track and drainage installations
- installation of light poles
- ongoing deliveries of materials, machinery and equipment to the site compounds at Kent Road and Lansdowne Road.

Bush Regeneration works completed by Muru Mittigar

- inspection and assessment of sites for planned future works
- removal of weeds by hand and using hand tools
- spot spraying of herbicides
- use of chainsaws to cut woody weeds and applying herbicide to the cut surface ("cut and paint" method).

Work hours:

Standard construction hours are Monday to Friday from 7am to 6pm and Saturdays from 8am to 1pm.

Some work will be required to take place outside our standard construction hours to minimise traffic impacts or to ensure the safety of pedestrians, motorists and our workers. Out-of-hours work activities will be carried out in line with the project Environmental Protection Licence, Road Occupancy Licences, and Transport for NSW requirements.

Out-of-hours work includes:

- delivery of over-sized equipment and machinery and materials
- precast beam delivery and installation at Orchard Hills Station
- 24/7 tunnel fit-out activities
- extended work hours for excavation, formwork, reinforcement and concrete pour, steel fixing, concrete pours and concrete finishing works inside the station box at the Orchard Hills site and at the Stabling Maintenance Facility across various structures including the Operations Control Centre (OCC) and Maintenance and Administration Building (M&A)
- dewatering activities at the Orchard Hills and Stabling Maintenance Facility sites
- concrete batching plant operations at the Orchard Hills Station site
- construction of a new 132kV powerline on Patons Lane including excavations, trenching and backfilling, cable laying, and installation of utility services
- on-going combined services route (CSR) works and trunk service installation
- concreting and formwork for the viaducts

- rail track installations
- service utility installations and surveying
- road surface and restoration works including filling in potholes on Kent, Lansdowne and other local roads.

Impacted surrounding residents and businesses will be notified in advance of any out-of-hours work.

What to expect:

- mitigation measures will be in place to minimise impacts including installing noise blankets where feasible, respite periods during high noise activities, noise and vibration monitoring, and water carts for dust suppression
- increased light and heavy vehicle movements on surrounding roads, and local road closures. All vehicles will be turned off when not in use, non-tonal reversing alarms will be fitted to plant and machinery and trucks will avoid reversing into and on site, where feasible
- temporary lighting to ensure a safe worksite will be directed away from properties
- communication will be limited to radios only when moving and unloading equipment, with no use of horns or loud radios
- traffic control and signage to safely assist motorists, pedestrians, and cyclists
- livestock should be monitored, as nearby activity may generate noise that could unsettle animals.

Equipment used:

Equipment used will include, but is not limited to, excavators, cranes, dozers, graders, rollers, vacuum truck, water carts, heavy and light site vehicles, generators, survey equipment, traffic management devices, concrete agitators, pneumatic drills, concrete saws, bobcats, chainsaws, telehandler, non-powered and powered hand tools (including hammers and drills), franna, GenSet and light vehicles.

Changes to traffic, pedestrian, and cyclist routes:

During these works, traffic control will be in place to assist motorists, pedestrians, and cyclists with any changes to traffic conditions. This may include contraflow (managed directional changes to the flow of traffic) and stop-slow traffic controls. The time of these changes will vary and are dependent on road authority approvals.

Access to driveways and buildings will be maintained at all times. Residents will be separately notified if access to driveways will be affected, or access to private property is required.

Three-month out-of-hours lookahead activities:

Activity	Equipment	Work hours	Timing
SSTOM works – Orchard Hills Metro Station site			
Concrete pours and finishing work in station box	Concrete pump, concrete agitator, concrete vibrator, helicopter, screed, hand drill, non-powered hand tools (including hammers), franna, GenSet, light vehicles	6pm to 12am, and 5am – 10pm - Monday to Friday 6am to 6pm, Saturdays	Ongoing - 2025
Works within the station box to support the tunnel and underground station box fit out	Gantry Crane (Electric), telehandler, excavator, front end loader, hand drills	24 hours a day, seven days a week	Ongoing - 2025
Concrete batching plant operations	Drives and conveyors, front end loader, concrete loading, concrete slumping, concrete truck, light vehicles	5am to 10pm, Monday - Friday. 6am to 6pm Saturday	Ongoing - 2025

Installation, incoming and outgoing deliveries of oversized construction material	OSOM, franna, mobile crane, gantry crane (Electric), telehandler, excavator, front end, loader, hand drills	10pm to 7am	Ongoing - 2025
Oversized plant and equipment activities	OSOM, franna, mobile crane	10pm to 7am	Ongoing - 2025
Tree removal on Kent and Lansdowne Road	Crane, light vehicles, traffic management for lane closure on kent road and hand tools.	7am to 6pm	June 2025 – August 2025
SSTOM works – Stabling Maintenance Facility site			
Extended work hours for CSR works	Excavators, day makers, trench roller, light vehicles	6pm to 2am Monday to Friday (inclusive) 1pm to 6pm Saturday. Note: To continue if consented to by the community.	Ongoing - 2025
Concrete pours and finishing works, steel fixing	Operations Control Centre (OCC) and Maintenance and Administration Building (M&A) Generator, light vehicles, concrete pump concrete agitator, daymaker	6pm to 12am and 5am to 7am Monday to Friday 6am to 6pm, Saturday	Ongoing - 2025
Extended work hours for use of oversized plant and equipment activities	Traffic management, light and heavy vehicles, generators, lighting towers and mobile cranes.	10pm to 7am	Ongoing - 2025
SSTOM works – Linewide			
Concreting and formwork Oversized deliveries of plant and materials Rail track installations Service utility installations and surveying	Excavators, cranes, dump trucks, water carts, heavy and light site vehicles, generators, traffic management devices, concrete agitators, pneumatic drills, concrete tools and hand tools.	7am Mondays through to 6pm Saturdays (24 hours)	August 2025 – April 2026

Feedback:

Detailed Noise and Vibration Impact Statements (DNVIS) have been prepared, including proposed mitigation measures based on noise modelling. Your feedback on appropriate respite periods or mitigation measures is encouraged. The SSTOM Community Engagement strategy is online.

Please visit parklifemetro.com.au to view these documents and contact us to provide any feedback.

If you would prefer to receive updates by email, please let us know via sydneymetrowsa@transport.nsw.gov.au and we will add you to the distribution list.

Thank you for your cooperation while we complete this essential work.

Appendix B Specific notification

Have your say

Continuation of extended out-of-hours work

August 2025

Sydney Metro is Australia's biggest public transport project.

Sydney Metro – Western Sydney Airport is the new metro railway line which will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. A city-shaping project, the 23-kilometre new railway will connect the new Bradfield City Centre in the south with St Marys in the north – where customers can connect to the existing Sydney Trains suburban T1 Western Line. The NSW and Australian governments have a shared objective of having Sydney Metro – Western Sydney Airport operational when the airport opens for passenger services.

Parklife Metro consortium is delivering the Stations, Systems, Trains, Operations and Maintenance (SSTOM) works contract for Sydney Metro – Western Sydney Airport.

Proposed continuation of out-of-hours work:

Activity	Equipment	Work hours	Timing
Stabling and Maintenance Facility (SMF) site			
Combined Service Route works (CSR)	Excavators, dump trucks, graders, compactors, drum rollers, dozers, heavy and light vehicles, generators and lighting towers.	6pm to 2am, Monday to Friday (inclusive) 1pm to 6pm, Saturdays	August 2025 – December 2025
Linewide			
Concreting and formwork Oversized deliveries of plant and materials Rail track installations Service utility installations and surveying	Excavators, cranes, dump trucks, water carts, heavy and light site vehicles, generators, traffic management devices, concrete agitators, pneumatic drills, concrete tools and hand tools.	7am Mondays through to 6pm Saturdays (24 hours)	August 2025 – April 2026

Out-of-hours work proposal: continuation of extended work hours

We are seeking feedback and consent to continue the extended work hours of the following project sites:

- Stabling and Maintenance Facility
- Linewide – Lansdowne Road to Warragamba Pipeline

A Detailed Noise and Vibration Impact Statement (DNVIS) has been prepared for this work and determined the need to contact you for continued feedback and consent. Please see the appended Feedback Form.

Our standard work hours remain Monday to Friday from 7am to 6pm, and Saturday from 8am to 1pm. The extended Linewide work hours are proposed to continue until Thursday 30 April 2026.

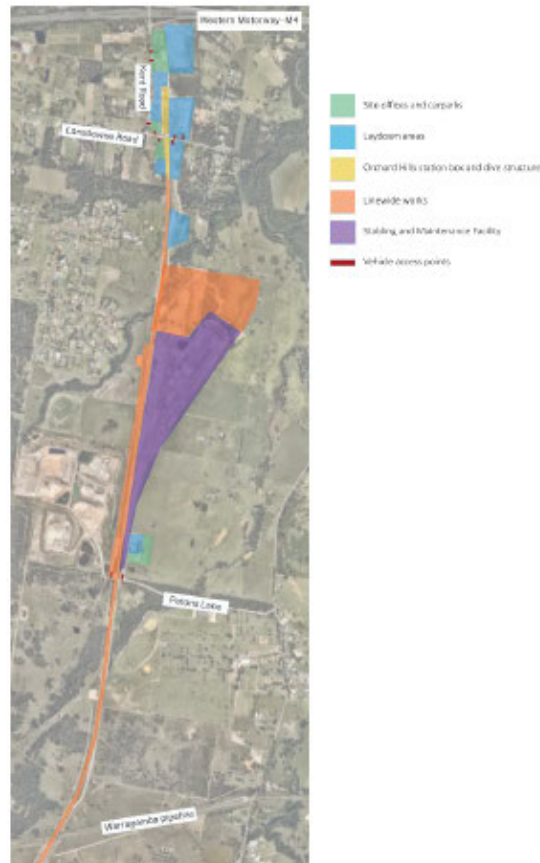

What to expect:

- Work activities during the extended hours will generate increased noise levels beyond the usual background due to ongoing construction activities. Mitigation measures will be in place to minimise these impacts including noise monitoring to ensure they don't exceed predicted levels, directing lights away from residential properties, dust suppression and use of noise blankets.
- Project teams have not worked every night shift throughout the project alignment. An approval of this

proposal enables the project teams to work during these hours whenever necessary.

- This work continuation proposal enables the project team to shorten the construction timeline of the project and even out the construction and vehicle impact by working during the day and night.
- During this consultation process and the out-of-hours work timeline (if approved), you are welcome to change the status of your feedback and consent by contacting the Parklife Metro community team.
- Unless you advise the project otherwise, we will contact you every three months for feedback and ongoing consent to this proposal.

Work areas:

Contact us:

Please contact the Parklife Metro community team on 1800 717 703 or email sce-community@parklifejv.au if you have any questions or would like to provide feedback and consent about the work, including appropriate respite periods. Thank you for your cooperation while we complete this essential work.

Community Consultation Consent Form – Continuation Proposal

August 2025

Extended work hours proposal

Parklife Metro is seeking feedback and consent to continue extended work hours of the following Sydney Metro – Western Sydney Airport project sites:

- Linewide – Lansdowne Road to Warragamba Pipeline
- Stabling and Maintenance Facility (SMF)

Our standard work hours remain Monday to Friday from 7am to 6pm, and Saturday from 8am to 1pm. The proposal enables the Linewide Team to continue to work 24 hours when required, between 7am Monday through to 6pm Saturday. The extended Linewide work hours are proposed to continue until Thursday 30 April 2026. Work at the SMF would continue from 6pm to 2am, Monday to Friday (inclusive), and 1pm to 6pm, Saturdays, until December 2025.

Community Consultation Consent Form – Continuation Proposal

August 2025 - Extended work hours proposal

Parklife Metro is seeking feedback and consent to continue extended work hours of the following Sydney Metro – Western Sydney Airport project sites:

- Linewide – Lansdowne Road to Warragamba Pipeline
- Stabling and Maintenance Facility (SMF)

Our standard work hours remain Monday to Friday from 7am to 6pm, and Saturday from 8am to 1pm. The proposal enables the Linewide Team to continue to work 24 hours when required, between 7am Monday through to 6pm Saturday. The extended Linewide work hours are proposed to continue until Thursday 30 April 2026. Work at the SMF would continue from 6pm to 2am, Monday to Friday (inclusive), and 1pm to 6pm, Saturdays, until December 2025.
