# 1 Introduction

## 1.1 Background

Sydney Metro is Australia's biggest public transport program comprising four main packages of work including Metro North-West Line, Sydney Metro City and Southwest, Sydney Metro West, and Sydney Metro Western Sydney Airport (SMWSA, the Project). The SMWSA will become the transport spine for Greater Western Sydney, connecting communities and travellers with the new Western Sydney International (Nancy-Bird Walton) Airport (referred to as Western Sydney International) and the growing region.

The Project involves the construction and operation of a new metro railway line around 23km in length that extends from the existing Sydney Trains suburban T1 Western Line at St Marys in the north to the new Bradfield Station in the south at Bringelly. The alignment includes a combination of tunnel, surface, bridges and viaduct sections, and comprises of six new metro stations between St Marys and the Bradfield Core precinct, as well as a stabling and maintenance facility and operational control centre to support the operation of the new metro railway line (see Figure 1).

### 1.1.1 Stations, Systems, Trains, Operations and Maintenance works

Parklife Metro D&C has been engaged to deliver the Stations, Systems, Trains, Operations and Maintenance (SSTOM) works. The scope of the Stations, Systems, Trains, Operations and Maintenance (SSTOM) package comprises:

- construction of the six new stations
- installation of tracks, signalling, mechanical and electrical systems
- supplying new driverless trains
- construction of stabling and maintenance facility at Orchard Hills
- operation and maintenance of the line and its assets, and
- handback of operations and maintenance at the end of term.

FIGURE 1 OVERVIEW OF SMWSA PROJECT

## 1.2 Scope of this report

Parklife Metro D&C have been issued an Environment Protection Licence (EPL No. 21807) from the NSW Environment Protection Authority (EPA) for the SMWSA SSTOM Works. The EPL applies to the works approved under the Infrastructure Approval SSI-10051 associated with the delivery of the off-airport portion of the SMWSA SSTOM Works, as detailed in Table 1. This EPL Monitoring Report provides the results of all pollution monitoring required to be measured or monitored by the licensee of EPL 21807 within the reporting period as required by Section 66 of the *Protection of the Environment Operations Act 1997* (POEO Act) and with reference to EPA Publication *Requirements for publishing pollution monitoring data* (Environment Protection Authority, 2013).

## 2 Reporting requirements

Under the POEO Act, holders of environment protection licences (licensees) must publish or make pollution monitoring data available to members of the public.

The POEO Act Section 66 requires:

*“Conditions requiring monitoring, certification or provision of information, and related offences*

*(1) Monitoring The conditions of a licence may require—*

*(a) monitoring by the holder of the licence of the activity or work authorised, required or controlled by the licence, including with respect to—*

*(i) the operation or maintenance of premises or plant, and*

*(ii) discharges from premises, and*

*(iii) relevant ambient conditions prevailing on or outside premises, and*

*(iv) anything required by the conditions of the licence, and*

*(b) the provision and maintenance of appropriate measuring and recording devices for the purposes of that monitoring, and*

*(c) the analysis, reporting and retention of monitoring data.*

*(2) False or misleading information A holder of a licence who supplies information, or on whose behalf information is supplied, to the appropriate regulatory authority under the conditions of the licence is guilty of an offence if the information is false or misleading in a material respect.”*

The primary objective of the EPL Monitoring Report is that members of the public have access to the results of all pollution monitoring (which a licence specifies must be carried out) in a way that is meaningful to them.

The monitoring data that must be published and/or made available on request is any data that is obtained as a result of a monitoring condition on a licence that relates to air, water (surface or groundwater), noise and/or land pollution. The data to be published or provided is limited to data that relates to pollutants generated, discharged or emitted from the licensed premises.

The data is provided in tabular format that is easy for the general public to understand. Tables definitively display raw data values, while graphs and charts are useful for overviews and visualisation of long-term trends. Raw data will be provided upon request.

This EPL Monitoring Report will provide explanations as to why data may appear to be missing, which may be due to there being no discharge or the level of pollutant being below the detection level of the measurement instrument.

It's possible from time to time that incorrect data may get published in good faith. As soon as practicable after the licensee becomes aware that the published pollution monitoring data is incorrect or misleading, licensees must then publish a correction log to correct this data that is incorrect or misleading.

Table 2 provides a summary of the monitoring requirements of EPL 21807.

**TABLE 2 EPL 21807 MONITORING REQUIREMENTS**

| <b>EPL Condition</b> | <b>Requirement</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>Report Reference</b>           |

M2.2

Water and/or Land Monitoring Requirements

POINT 1, 3, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17

| Pollutant      | Unit of measure               | Frequency           | Sampling Method   |
|----------------|-------------------------------|---------------------|-------------------|
| Oil and Grease | Visible                       | Special Frequency 1 | Visual inspection |
| pH             | pH                            | Special Frequency 1 | Probe             |
| Turbidity      | nephelometric turbidity units | Special Frequency 1 | Probe             |

POINT 2

| Pollutant               | Units of measure            | Frequency                              | Sampling Method       |
|-------------------------|-----------------------------|----------------------------------------|-----------------------|
| Aluminium               | milligrams per litre        | Daily during any Grab sample discharge | Grab sample           |
| Ammonia                 | milligrams per litre        | Daily during any Grab sample discharge | Grab sample           |
| Chromium (VI) Compounds | milligrams per litre        | Daily during any discharge             | Grab sample           |
| Copper                  | milligrams per litre        | Daily during any discharge             | Grab sample           |
| Electrical conductivity | microsiemens per centimetre | Daily during any discharge             | Grab sample           |
| Nitrogen (total)        | milligrams per litre        | Daily during any discharge             | Grab sample discharge |
| Oil and Grease          | Visible                     | Daily during any discharge             | Visual Inspection     |
| pH                      | pH                          | Daily during any discharge             | Probe                 |
| Phosphorus (total)      | milligrams per litre        | Daily during any discharge             | Grab sample           |
| TSS                     | milligrams per litre        | Daily during any discharge             | Grab sample           |
| Zinc                    | milligrams per litre        | Daily during any discharge             | Grab sample           |

POINT 4

| Pollutant               | Units of measure            | Frequency                | Sampling Method   |
|-------------------------|-----------------------------|--------------------------|-------------------|
| Aluminium               | milligrams per litre        | Monthly during discharge | Grab sample       |
| Ammonia                 | milligrams per litre        | Monthly during discharge | Grab sample       |
| Chromium (VI) Compounds | milligrams per litre        | Monthly during discharge | Grab sample       |
| Copper                  | milligrams per litre        | Monthly during discharge | Grab sample       |
| Electrical conductivity | microsiemens per centimetre | Monthly during discharge | Grab sample       |
| Nitrogen (total)        | milligrams per litre        | Monthly during discharge | Grab sample       |
| Oil and Grease          | Visible                     | Monthly during discharge | Visual Inspection |
| pH                      | pH                          | Monthly during discharge | Probe             |
| Phosphorus (total)      | milligrams per litre        | Monthly during discharge | Grab sample       |
| TSS                     | milligrams per litre        | Monthly during discharge | Grab sample       |
| Zinc                    | milligrams per litre        | Monthly during discharge | Grab sample       |

M2.3

For the purposes of Condition M2.2 and the Table thereto, 'Special Frequency 1' means:

a) less than 24 hours prior to a controlled discharge and daily for any continued controlled discharge, when it is safe to do so; and

b) when rainfall causes a discharge from a sediment basin which has not been emptied within the design management period following cessation of a rainfall event, when it is safe to do so.

## 3 Monitoring

This section presents summaries of the monitoring completed in the reporting period from 1 May 2026 to 31 May 2026.

Detailed monitoring results for each program are presented in the Appendices.

### 3.1 Weather Monitoring

Meteorological observations were captured using the Bureau of Meteorology Weather Stations - Badgerys Creek (Station 067108) and Penrith Lakes (Station 067113). Meteorological data for the month of May can be found within Appendix A.

Penrith Lakes Station reported 47.2 mm total rainfall for the reporting period, with seven days exceeding 1mm, three days exceeding 10mm, and no days exceeding 20mm of rain.

During the reporting period, 12 days recorded wind gusts greater than 25km/hr, one day where the maximum wind gust recorded was greater than 50 km/h, and no days where the maximum wind gust recorded was greater than 60 km/hr.

Badgerys Creek Station reported 81.8 mm total rainfall for the reporting period, with 13 days exceeding 1mm, three days exceeding 10mm, and no days exceeding 20mm of rain.

During the reporting period, 18 days recorded wind gusts greater than 25km/hr, one day where the maximum wind gust recorded was greater than 50 km/h, and one days where the maximum wind gust recorded was greater than 60 km/hr.

Detailed weather observation records for the reporting period are presented in Appendix A.

This information is used daily on site to assess daily activities and consider mitigation measures as required.

TABLE 3 WEATHER SUMMARY AND TRIGGER WEATHER EVENTS FOR REPORTING PERIOD

| Weather Event<br>(Penrith Lakes Station) | Observation | Weather Event (Badgerys<br>Creek Station) | Observation |
|------------------------------------------|-------------|-------------------------------------------|-------------|
| Minimum temperature (°C)                 | 4.5         | Minimum temperature (°C)                  | 4.5         |
| Maximum temperature (°C)                 | 17          | Maximum temperature (°C)                  | 16.5        |
| Total rainfall (mm)                      | 47.2        | Total rainfall (mm)                       | 81.8        |
| Number of days with rain (>1mm)          | 7           | Number of days with rain (>1mm)           | 13          |
| Number of days with rain<br>(>10mm)      | 3           | Number of days with rain<br>(>10mm)       | 3           |
| Number of days with rain<br>(>20mm)      | 0           | Number of days with rain<br>(>20mm)       | 0           |
| Number of days with >25km/h<br>wind gust | 12          | Number of days with >25km/h<br>wind gust  | 18          |
| Number of days with >50km/h<br>wind gust | 1           | Number of days with >50km/h<br>wind gust  | 1           |

|                                       |   |                                       |   |
|---------------------------------------|---|---------------------------------------|---|
| Number of days with >60km/h wind gust | 0 | Number of days with >60km/h wind gust | 0 |
|---------------------------------------|---|---------------------------------------|---|

### 3.2 Noise and Vibration Monitoring

Noise monitoring is required under Conditions L5.9, L5.10, L5.11, L5.12, L5.13, L5.14 and E1.5 to validate noise predications for work undertaken outside of standard construction hours in accordance with the construction noise and vibration assessment and monitoring plan. All noise monitoring performed under EPL (21807) will be included in Appendix B.

TABLE 4 SUMMARY OF NOISE MONITORING FOR REPORTING PERIOD

| Date       | Monitoring Location                | Attended / Continuous | Description                         |
|------------|------------------------------------|-----------------------|-------------------------------------|
| 07/05/2026 | 145 Badgerys Creek Road, Bradfield | Attended              | Residence west of Bradfield Station |

## **3.3 Water Monitoring**

### **3.3.1 Surface water monitoring**

As per Condition E2.1 fortnightly sampling is required for at least 3 months from the date Point 2 was added to the licence (30 November 2023). This period ended on 30 February 2024, and additional background monitoring was obtained through May and April. This monitoring is now complete. These water monitoring results will be presented in Appendix C accordingly.

### **3.3.2 Discharge to water**

The discharge of water from sediment basins did not occur at any discharge point during the reporting period:

The EPL discharge criteria apply to sediments basins identified in condition L2.4 of the approved EPL 21807. Basins and discharge points are summarised in Table 5.

TABLE 5 MONITORING/DISCHARGE POINTS AND AREAS

| ID        | Construction Status | EPA ID | Easting   | Northing   | Description of location of discharge point                                                                            | Catchment name | Name of nearest waters | Direct discharge to waters | Date added to EPL |
|-----------|---------------------|--------|-----------|------------|-----------------------------------------------------------------------------------------------------------------------|----------------|------------------------|----------------------------|-------------------|
| SSTOM-001 | Not Active          | 1      | 290807.84 | 6243844.20 | The outlet of the sediment basin on the Bradfield site discharging to Thompson Creek                                  | South Creek    | Thompsons Creek        | Yes                        | 14/11/2023        |

## Appendix B    Noise Monitoring

TABLE 8 DETAILED NOISE MONITORING DATA

| Date       | Time  | Construction Activity | Activity Location | Monitoring Location                | NML (dBA) | Predicted (dBA) | Recorded LAeq(15min) (dBA) | LAmix | LA10 | LA90 | Exceedance of Predicted (dBA) | Exceedance of Predicted | Comments                                                                                                                                                                                                                                                              |
|------------|-------|-----------------------|-------------------|------------------------------------|-----------|-----------------|----------------------------|-------|------|------|-------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07/05/2026 | 22:15 | Pre-cast Install      | BRD               | 145 Badgerys Creek Road, Bradfield | 39        | 42              | 41.6                       | 64.4  | 40.6 | 39.3 | -0.4                          | No                      | PLM construction was the dominant noise source throughout the attended monitoring session, with additional noise sources coming from background traffic, along with noises from dogs and sheep in the surrounding area. PLM work was compliant with DNVIS predictions |

---

## Appendix C      Surface water monitoring

No surface water monitoring was conducted for this month's monitoring report. Any surface water monitoring conducted as part of Parklife Metro's EPL licence will be presented accordingly.

## Appendix D      Premise Maps – May

|
